

Gingerbread Cube Template

Cut these out to help you create parchment paper templates and build a gingerbread cube!

- 1** Cut out the three shapes labeled "a," "b," and "c."
- 2** Trace and cut two copies of each shape onto parchment paper.
- 3** Use a knife or pizza cutter to trace the six parchment paper pieces onto your rolled out gingerbread dough.
- 4** After baking, use icing to glue the gingerbread pieces as shown in the diagram on the next page.
- 5** Attach a long edge of "b" to one of the edges of "a" at a 90 degree angle (forming an L shape).
- 6** Attach the other long edge of "b" to one of the edges of the second "a" piece, at a 90 degree angle. The two "a" shapes will also connect.
- 7** Repeat with the second "b" piece on the opposite side.
- 8** Finally, attach the "c" pieces so the a long edge connects to an "a" piece and the short edges connect to both "b" pieces.
